

## Access2Work Helping You Find the Right Job

Flagstaff's Access2Work project is here to support you in finding a job that fits your skills and employment goals.

Access2Work is designed for people with disability to explore employment opportunities and secure a job that's right for you.

Funded by

Australian Government  
Department of Social Services

## Your journey to employment starts with Flagstaff

We understand that everyone's abilities are different, and that's why Flagstaff offer supported employment and work experience as a core pathway. This means we work with you to gradually build your skills and confidence, so you can succeed in your ideal job.

## Achieve your career goals

Through innovative strategies and the use of technology, we provide various levels of support that meet your individual needs.

## We are with you every step of the way

Our approach is structured to not only support you but also to prepare employers to better understand how to create opportunities for people with disabilities.

We work with employers to ensure that the jobs are suited to your abilities and interests by customising roles that match your skills with what businesses need.

## How does our 5-step pathway work for people with disability?

- 1 Dream Big**  
Explore the skills and job opportunities that excite you.
- 2 Get Ready**  
Build your skills, resume, feel confident to go for interviews, learn how to get around. Sharpen your all-important soft skills with the help of our tech-tools.
- 3 Jump In**  
Try out volunteering, work experience, job trials, hybrid or flexible work. With plenty of feedback and support along the way.
- 4 Thrive**  
Be supported and step into a welcoming and inclusive workplace, where you can grow, succeed, and be part of the community!
- 5 Support**  
Your employer will also build their capacity and be able to access tools to support you in your career.
